## **Amendments to the Claims:**

The following claims will replace all prior versions of the claims in this application (in the unlikely event that no claims follow herein, the previously pending claims will remain):

11.

- 1-9. (Cancelled).
- 10. (Currently amended) A method of dry cleaning, comprising which includes contacting <u>a</u> textile material with a <del>detergent free</del> dry cleaning medium based on liquid CO<sub>2</sub> and including from 0.01 to 5% by weight, relative to the total weight of the <u>dry cleaning medium</u>, of the cleaning medium of a cleaning additive <u>that comprises a</u> which is at least one C<sub>6</sub> to C<sub>24</sub> hydrocarbyl ester of a multi-carboxylic acid.
- 11. (Currently amended) A method as claimed in claim 10 wherein the  $\underline{C_6}$  to  $\underline{C_{24}}$  hydrocarbyl ester of the multi-carboxylic acid multi-ester includes at least one compound of the formula (I):

$$R^{1}(CO_{2}R^{2})_{n}$$
 (I)

where X, R<sup>1</sup>, R<sup>2</sup> and n are as defined in claim 2

- R<sup>1</sup> is the residue of a C<sub>1</sub> to C<sub>10</sub> hydrocarbyl group from which n hydrogen atoms have been removed;
- R<sup>2</sup> is a C<sub>6</sub> to C<sub>24</sub> hydrocarbyl group; and
- $\underline{n}$  is from 2 to 5.
- 12. (Original) A method as claimed in claim 11 wherein  $R^2$  is a  $C_8$  to  $C_{20}$  alkyl group.
- 13. (Original) A method as claimed in claim 12 wherein  $R^2$  is a  $C_{12}$  to  $C_{18}$  alkyl group.
- 14. (Currently amended) A method as claimed in claim 10 wherein the  $\underline{C_6}$  to  $\underline{C_{24}}$  hydrocarbyl ester of the multi-carboxylic acid ester is an ester of adipic acid or a mixture containing such an ester.

15. (Currently amended) A method as claimed in claim 10 wherein the average molecular weight of the  $\underline{C_6}$  to  $\underline{C_{24}}$  hydrocarbyl ester of the multi-carboxylic acid multi-ester(s) is from 300 to 750.

14.15.1

- 16. (Currently amended) A method as claimed in claim 10 wherein the <u>dry</u> <u>cleaning medium includes</u> <u>amount of cleaning additive multi-ester present in the cleaning medium is</u> from 0.1 to 0.5% by weight <u>of the cleaning additive, relative to the total weight of the dry cleaning medium of the cleaning medium.</u>
- 17. (Currently amended) A method as claimed in claim 10 in which the <u>dry</u> cleaning medium additionally includes at least one fragrance, optical brightener, fabric conditioner, enzyme and/or bleach.
- 18. (Previously presented) A method as claimed in claim 10 wherein the cleaning process is carried out at a temperature of from -5 to 25°C.
- 19. (Original) A method as claimed in claim 18 wherein the temperature is from 10 to 25°C.
- 20. (Original) A method as claimed in claim 19 wherein the temperature is from 20 to 25°C.
